ABOUT ME

Experienced software engineer with over 4 years of professional experience, showcasing a focused approach to problem-solving, adept troubleshooting skills, and a quick learner. Proficient in cross-platform development, inter-process communication, creating cross-platform user interfaces (desktop, mobile, and embedded), and skilled in real-time data delivery across networks. Holds a bachelor's degree from a prestigious university acquired through a competitive selection process.

WORK EXPERIENCE

Embedded Software Engineer

Software Motion [1 May 2024 – Current]

City: Suzhou | Country: China

- Worked on a project in self-driving automotive systems, focusing on ADAS development and AUTOSAR-based solutions.
- Implemented a module to visualize data in the RVIZ application using RVIZ APIs.
- Developed modules to establish connections between various components using ROS in C++ and Python.
- Created modules with a code auto-generation approach to reduce development time.
- Developed a library for preprocessing LiDAR points using a node-based approach.
- Maintained legacy code.

Software Engineer

IPAC [1 Oct 2022 – 1 May 2024]

City: Tehran | Country: Iran

- Developed a client-server file synchronization project using C++.
- Developed encrypt client and decrypt client with node base approach.
- Developed several responsive user interfaces (UIs) using QML.
- Created a peer-to-peer (p2p) messenger application for Android and Windows using Qt/QML 6.5, integrating native code in Java and C++. Established connectivity between the application and SQLite by implementing a custom QML model in C++.
- Conducted proof-of-concept (PoC) research in Kotlin multiplatform.

Software Engineer

Ai-Bridge [1 Feb 2022 – 1 Jul 2022]

City: Stuttgart | Country: Germany

- Developed an installer utilizing the Qt Installer Framework.
- Created a client application using Qt/QML.
- Successfully resolved the challenge of establishing efficient communication between Python and C++ processes.

Software Engineer

Freelance [1 Jul 2022 – 1 Sep 2022]

Country: Germany

- Developed a packet forwarding service for custom embedded devices.
- Collaborated on a project involving the detection of human smiles using an ESP-32 cam board.

C/C++ Developer

FD Eshragh [1 Nov 2020 – 1 Apr 2022]

City: Tehran | Country: Iran | Business or sector: Information and communication

- Developed a multi-user server facilitating real-time data delivery (e.g., voice, text, GPS coordinates) between users using different types of clients and servers. Implemented thread-safe mechanisms to ensure data synchronization and achieved low latency in VoIP.
- Restructured the user interface (UI) of an embedded device using the LVGL framework.
- Conducted debugging and troubleshooting activities on legacy codebase.
- Developed several tools using Qt and QWidget.

EDUCATION AND TRAINING

Bachelor of Computer Science

Azarbaijan Shahid Madani [1 Sep 2018 – 1 Jun 2023]

City: Tabriz | Country: Iran | Website: <https://intl.azaruniv.ac.ir/> | Final grade: 3.2/4 | Thesis: open source VoIP application written in C++/Qt/QML

LANGUAGE SKILLS

Mother tongue(s): Persian

Other language(s):

English

LISTENING C1 READING C1 WRITING C1

SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

C++17 / C / Python / Matlab / QML / Dart / Qt / Flutter / MySQL / Concurrent Programming / Git / Network / SQLcipher / SQLite / VoIP / Autosar / ROS / HMI
